PROFESSIONAL SUMMARY

Senior Full-Stack Developer and Technical Lead with 15 years of software and web development experience spanning frontend, backend, databases, integrations, testing, deployment, and production support. Experienced in building and supporting applications using React and Angular frontends, Java and Laravel backends, SQL databases, and REST/SOAP APIs. Delivered e-commerce, booking, content-management, Oracle SaaS integration, survey-platform, and POS payment solutions while leading technical decisions and collaborating closely with clients and delivery teams.

CORE TECHNICAL SKILLS

Frontend: React, Angular, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Oracle JET

Backend: Java, PHP, Laravel, Express, CodeIgniter, REST APIs, SOAP APIs, TCP Socket APIs

Databases: MySQL, Oracle SQL, SQLite, PostgreSQL

FinTech: POS applications, payment-processor integration, GPAY, TSYS, FDRC

Cloud & Servers: AWS Cloud, Oracle WebLogic Server, Windows Server, cPanel

Development Tools: Git, GitHub, Bitbucket, Jira, Postman, SoapUI, Android Studio, Visual Studio Code

Additional: System analysis, data analysis, software testing, quality assurance, technical documentation, client support, project coordination

PROFESSIONAL EXPERIENCE

POS Developer | APEX Computer Solution Co. LLC

Dubai, UAE | February 2024 - May 2026

- Developed Java-based POS payment solutions and supported Android frontend application functionality within the FinTech sector.
- Implemented payment-related features and integrations using REST APIs and TCP socket APIs.
- Integrated POS applications with GPAY, TSYS, and FDRC payment processors.
- Worked with Java, SQLite, Android, Postman, Jira, GitHub, and Bitbucket throughout development and testing.
- Investigated payment-processing issues and validated API requests, responses, and transaction flows.
- Collaborated with technical and business stakeholders to implement processor and customer requirements.

Technical Lead | Avidhilda

Dubai, UAE | July 2023 - February 2024

- Led the technical direction of a software development team working on e-commerce, content-management, and booking platforms.
- Made architecture and application-design decisions while providing technical guidance to team members.
- Developed and maintained solutions using Laravel, React, SQL, Tailwind CSS, and REST APIs.
- Reviewed system requirements, planned technical modifications, and supported implementation across frontend and backend components.
- Managed web application deployment and hosting through cPanel.
- Used Bitbucket, Sourcetree, and Postman for source control, collaboration, and API testing.

Oracle Cloud Technical Consultant | APPSPRO

Dubai, UAE | December 2019 - June 2023

- Developed custom web applications that integrated with Oracle Cloud SaaS applications.
- Built frontend functionality using Angular and Oracle JET.
- Developed Java-based REST web services and integrated applications through REST and SOAP APIs.
- Provided technical solutions and customer support for Oracle Integration Cloud APIs and application integrations.
- Tested integrations and application workflows using Postman and SoapUI.
- Supported deployment and application operation within Oracle WebLogic Server environments.
- Participated in quality assurance, troubleshooting, and technical documentation.

Senior Web Developer | GIS International

Dubai, UAE | December 2018 - December 2019

- Developed full-stack web applications based on client and business requirements.
- Built e-commerce, online-booking, POS, content-management, and human-capital-management solutions.
- Developed backend functionality using Laravel and MySQL.
- Created frontend interfaces using React, Bootstrap, HTML, CSS, and JavaScript.
- Integrated third-party services through REST APIs.
- Supported application deployment, API testing, and production hosting using cPanel and Postman.

Web Developer | Alliance Software Inc.

Cebu City, Philippines | January 2018 - May 2018

- Supported an e-commerce web application integrated with a POS system for a fast-food business.
- Developed and maintained backend functionality using CodeIgniter and SQL.
- Worked with JavaScript, jQuery, Bootstrap, HTML, and CSS on application interfaces.
- Performed application testing, troubleshooting, and production support.
- Managed source code and deployment activities using Bitbucket, Sourcetree, and cPanel.

Survey Programmer | Dynata Cebu

Lapu-Lapu City, Philippines | December 2011 - January 2018

- Developed and maintained responsive web-based survey applications using PHP, SQL, HTML, CSS, JavaScript, jQuery, and Confinity.
- Implemented front-end interfaces, survey logic, validation, branching, and dynamic user interactions across desktop and mobile environments.
- Worked with SQL databases and research datasets for data validation, cleansing, transformation, and reporting.
- Performed cross-browser testing, debugging, quality assurance, and pre-deployment verification.
- Investigated application and data issues, identified root causes, and implemented practical technical solutions.
- Supported application hosting and deployment within AWS cloud environments.
- Generated and prepared raw datasets, tables, charts, and other research outputs for downstream reporting.
- Collaborated directly with clients to gather technical requirements, resolve issues, and support successful project delivery.

EDUCATION

Bachelor of Science in Computer Engineering | Software Engineering Major

University of San Carlos | Cebu City, Philippines | 2006 - 2011

Thesis: Developed an integrated catering-business solution spanning mobile, desktop, and web platforms, including e-commerce, content-management, and inventory functionality using Java and Bootstrap.

Graphic Designer Diploma

Filipino Institute Academy | Dubai, UAE | November 2022 - May 2023

Completed practical projects covering brand identity, logo design, brochures, business stationery, magazine covers, and advertising materials.
